Profile

Software Engineer (Frontend) with expertise in React, TypeScript, Angular, and Tailwind CSS, focused on building scalable and user-friendly applications. Experienced in Progressive Web Apps (PWAs), responsive UIs, and component-driven development. Strong background in IT support and design enhances product delivery. Passionate about teaching, collaboration, and creating impactful digital products.

Technical Skills

- **Frontend:** React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend (Basic):** Node.js, Express.js, MongoDB, REST APIs
- **UI/UX & Tools:** Figma, PWA Development, Responsive Design
- **Other Tools:** Git/GitHub, Vercel, Linux CLI, Webpack, n8n, Pusher, NPM/Yarn, Adobe Illustrator, Photoshop
- **Certifications:** Diploma in Cybersecurity (Alison), Ethical Hacker (Coursera)

Professional Experience

Cyclobold Technology Limited — Software Engineer / Graphics & Content Designer
July *2025 | Lagos, Nigeria*
- Built and maintained frontend features using React + TypeScript and Tailwind CSS.
- Converted React codebase to TypeScript (.tsx) for better maintainability.
- Built PWAs and reusable component libraries for scalable development.
- Designed UI assets, visuals, and brand identity for products and campaigns.
- Authored blog posts (Software Engineering, DevOps, Cloud, Cybersecurity, Data Science) on https://blog.cyclobold.com.
- Taught Software Engineering classes and assisted with training sessions in DevOps, Data Science, and Cloud Computing.
- Collaborated cross-functionally with engineering, training, and marketing teams.

Coodeck — Frontend Developer (Internship)
2024 – 2025
- Built React-based projects and contributed to Angular UI development.
- Improved responsive layouts and enhanced user experience across projects.
- Worked in an agile team, debugging and reviewing frontend code.

Riggs Properties — IT Support Specialist
2023 – 2024
- Delivered system troubleshooting, hardware/software support, and IT workflow improvements.
- Assisted in digitizing real estate processes and documentation.

John D'Queen Construction (JDQ) — IT Assistant / Tech Support
2018 – 2022
- Supported office IT operations, document digitization, and basic system setup.
- Provided day-to-day IT troubleshooting for staff.

Freelance — Software Developer, Graphic Designer & IT Specialist
2015 – Present
- Developed client websites and landing pages using React, JavaScript, CSS.

- Built small-scale web applications with integrated user features.
- Designed logos, brand identities, and digital assets (e.g., Hackaroo Solana Hackathon branding).
- Provided IT consultation and tech support for SMEs.

Projects

- ■ **Shopping List PWA** (Aug 2025)
Live: https://myshoppinglist.name.ng | Demo: https://shopping-list-opal.vercel.app/
Tech: React.js, Tailwind CSS
- Developed a progressive web app for managing shopping lists with offline support.
- Integrated Google Ads, enabling monetization.
- Built responsive design and efficient state-based item management.

- ■ **SocialPay (In Development)**
Tech: React, TypeScript, Node.js, MongoDB, Tailwind CSS
- Concept: A social media + fintech platform combining posts, payments, and dashboards.
- Designed TypeScript UI structure and authentication system with "Remember Me" functionality.

- ■ **Robotskillz (Ongoing)**
Tech: React.js, Tailwind CSS
- Designed and implemented UI/UX flow with reusable React components.
- Built responsive layouts, backend integration planned for later.

- ■ **Hackaroo Visual Identity** (2025)
- Designed branding and logo identity for Hackaroo, a Solana hackathon event presented by anzSOL.

Education

- BSc, Computer Science (in progress) — National Open University of Nigeria (NOUN)
- Diploma in Cybersecurity — Alison
- Ethical Hacker Certification — Coursera
- WAEC (2021) — Biyem High School

Strengths

- Strong frontend engineering foundation with React, TypeScript, Angular.
- Blend of engineering + design for polished UI/UX.
- Experience with real-world projects (PWAs, fintech apps, branding).
- Teaching experience in Software Engineering & DevOps-related fields.
- Quick learner, expanding into full-stack and cloud technologies.
